

Era Window Restrictors

The ERA Window Restrictor is designed specifically with child safety in mind, restricting the window opening to 75mm (3"). It is manufactured from high tensile aluminium and is available in two finishes. A special key is used to unlock and the lock can only be disconnected when the window is closed.

The Window Restrictor is ideal for high rise buildings as it allows ventilation with security. It is available for both wooden and metal framed windows.
