

Cupboard Door Gear 914 to 1828mm

A straightforward system that allows doors to glide smoothly and bypass each other in the sturdy aluminium tracks on nylon runners. The top channel is deeper than the bottom to allow doors to be lifted out for cleaning.

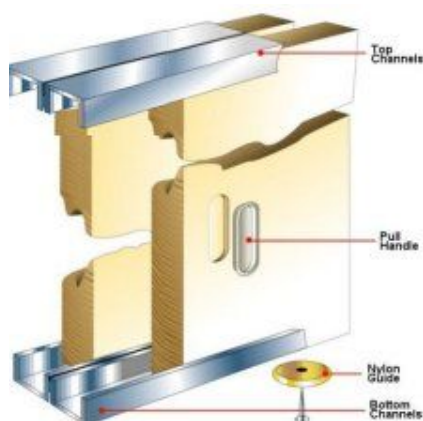

Fitting two or more cupboard doors to bypass each other.

Doors up to 8 sqft (2.4sqm).

Doors maximum thickness 19mm (3/4").

For more information please read the FAQ (Frequently Asked Questions) and the Fitting Instructions.

Adaptable to function with more doors per system using Fittings Kit SC1.
