

Capex 70 c/w H&V Gasket Brown, White 2.4 - 3.0 - 4.8 mtrs

6MTS ONLY AVAILABLE AS DIRECT DELIVERY TO SITE PLEASE RING

- Concealed Fixings for high quality finish
- Ideal for capping single, double or triple glazed glass, acrylic and polycarbonate structures
- Adjoining panels on the same plane or pitch to 5 degrees up or down
- High quality supply Hip and Valley gasket. When used on Hips or Valleys the gasket is simply reversed. For full gasket contact the Hip& Valley Gasket can be used on Hips or Valleys between 10°-25°. Exceeding these angles provides only partial contact
- So versatile for - conservatories, sky light roofing, glazed walk ways, shopping centres, swimming pools, railway and bus stations etc...
- Install wet or dry - no increased costs due to wet weather construction
- Maintenance friendly - damaged glazing is easily replaced - remove caps, loosen screws, replace damaged panel and tighten Capex down
- RAG 55 is a high quality flexible EPDM compatible with glass, polycarbonate and acrylic sheeting
- RAG 55 prevents damage to the glazing by forming a protective barrier between the glazing and the
