

TOPIX Wood Construction Screws - 8mm Shank Flange Head

Heco Topix Construction Screws

Professional screw with flanged head for use in wood construction. Ideal for joists and rafters and solar panel fixing system. Cosmetic Yellow Zinc plating. Assessed to BS EN114592 by TRADA Technology.

*** SUPPLIED IN BOXES OF 50 OR BOXES OF 100 AS PRICED ***

Patented Point for Reduced Splitting

High Pitch Thread for Faster Driving

Shank Ribs for Low Torque Driving

Increased Tensile Load Capacity due to 18mm Flange Head

Thickened Shank Area for Improved Shear Load when Recessed

T-40 Drive Reduces Cam-Out

No Predrilling Required - Even in Hardwood

Can reduce Working Time by Up To 75%

Heco Topix professional wood construction screws have been designed specifically for use in softwood and hardwood without pre-drilling. They are available in both Carbon Steel and Stainless Steel to maximise suitability across a broad range of applications.

There are however some instances in hardwood where it is advisable to either pre-drill or use Stainless Steel instead of carbon steel fixings.

This is because of the natural variations that occur in hardwoods dependent on species, age, and humidity. In addition application loads and uniformity of joint can vary considerably.

Price

8 x 65mm per100 (Product reference 3252-5290)	£17.45
8 x 80mm per 50 (Product reference 3252-5291)	£9.50
