

Wet Rot Wood Hardener

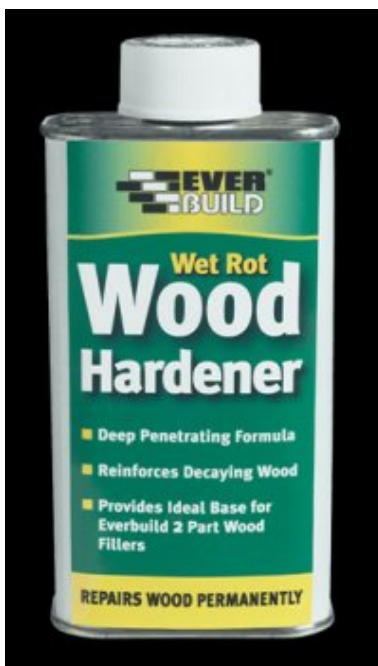

EVERBUILD Wet Rot Wood Hardener is a highly penetrative solution of selected resins in solvent which soaks deep into the fibers of decaying wood and dries to leave the wood hard and resistant to further moisture penetration. The resin-modified wood then becomes an ideal base for repair with EVERBUILD 2 PART HIGH PERFORMANCE WOOD FILLER. The solution is dry in 6 hours and is suitable for interior and exterior use providing a cost-effective alternative to replacing joinery affected by wet rot.

USES

Repairing wood damaged by wet rot (in conjunction with EVERBUILD 2 PART HIGH PERFORMANCE WOOD FILLER in both interior and exterior applications).

Strengthening and reinforcing both softwood and hardwood

Supplied in a 250ml tin
