

Wet stone sharpening system package deal

Wet stone sharpening systems compatible with a range of jigs are becoming increasingly popular with woodworkers.

Able to produce high quality repeatable results they can put a razor edge onto chisels and plane irons as well being useful for items such as knives, gardening tools and many other items.

The Record Power WG250 is the result of research carried out with a number of renowned turners and woodworkers who looked at the other machines on the market and advised what improvements they thought were needed to improve them.

*** Included in this package is the WG250/K Diamond Trueing Tool, an essential accessory to ensure the outer diameter remains concentric and the sharpening surface perfectly flat. ***
