

16" scroll saw variable speed

A real benefit of the SS16V is the variable speed - a feature not available on many scrollsaws - which gives the versatility to cut a range of different materials.

Slower speeds can be used for the cutting of plastic and non-ferrous metals, while faster speeds can be used for cutting wood up to 50mm thick.

Blades can be changed quickly and easily minimising interruptions to workflow, particularly when cutting intricate pieces. Blade tension can be adjusted just as easily using a simple and accessible adjuster.

Features:

- Universal Jaws
- Variable Speed
- Tilting Table
- Integral Work Light
- Dust Blower
- Blade Storage Drawer

Specifications:

- Throat Depth: 406 mm (16")
- Maximum Depth of Cut: 50 mm
- Speeds: 400 - 1600 rpm
- Table Tilt: 0 - 45°
- Motor: 75 W
- Weight: 16 kg
- Size: H360 x W330 x D600 mm
