

# Parting tool, Standard - 830

Parting Tools are used to part your finished project off from the waste material.

The parallel sides of Robert Sorby's parting tool make for a rigid tool that handles well. The 1/8" (3mm) width reduces the amount of waste. It can also be used as a fine detailing tool e.g. beads and fillets.

Made in Sheffield from the finest HSS steel, this tool is available in two sizes, both of which are available with or without the handle.

\*\*\* By purchasing this product, you are confirming that you are AGED 18 or over and that the person receiving the delivery is also over 18. Please note that we do occasionally ask for proof of age. \*\*\*
