MARCUS BLACK IRON CASEMENT STAY FB680

Decorative black iron casement stay that is part of the latest smooth, black iron range of external hardware from M. Marcus, perfect for creating a unified look to your windows. Matching Casement Fasteners also available, please see FB682 and FB684 in related products below.

To meet modern design preferences M. Marcus have removed the deep surface indentations found in traditional black ironmongery. Leaving only the natural surface grains to create a rustic yet smoother contemporary appearance. These black iron casement stays will complement traditional solid wooden windows or light coloured window fronts. Through use and time, the metal will not be affected by the elements due to quality and production process.

The smooth black casement stays in this collection are made from malleable iron, treated with zinc phosphating process and then powder coated that has unique UV protection added to the coating process making these a great choice for external use.

Supplied in SINGLES complete with fixings.

Dimensions:

FB680-254: 10" 254mm

FB680-308: 12" 308mm
