

Standard holesaw kit

Use Heller's high speed steel, bi-metal hole saw kit to cut clean & precise holes in numerous materials especially steel, iron & cast iron, non-ferrous alloys and even wood, plastic and plasterboard too. This 5 piece kit, designed to be driven by portable electric, cordless or air-powered drills, also contains a drive adaptor with pilot bit to ensure each hole is drilled accurately.

- Hole saw diameters - 22, 25, 29, 32 & 38mm
- Hex. shank drive adaptor with pilot bit (14 to 30mm dia.)
- Ejector spring (enables hole saw to be easily removed from drive adaptor)
- Extremely high run accuracy
- Clean, circular holes
- Variable pitch teeth for ideal cuts
- Shatterproof construction with solid receiving plate
