

Fix In 5 Adhesive

Product Description

EVERBUILD FIX IN 5, 5 min Fast Fix is an ultra-high strength construction adhesive with an almost limitless array of applications. The advanced, fibre reinforced, PU formula provides extra strength and gap filling properties, meaning FIX IN 5 can be used in the most demanding of jobs.

FIX IN 5 bonds virtually all materials including: timber, chip and fibre boards, MDF, coated boards, metals, aluminium, natural stone, concrete, marble, ceramics, plastics, plasterboards, foam (EPS), hard foam, acrylic and much, much more.

Benefits

Fast, easy application.

Suitable for interior and exterior use.

Good chemical resistance.

Weather resistant.

Can be sanded, stained, painted or varnished once dry.

Bridges gaps.

Sound deadening.

Excellent primer-less adhesion.

Areas For Use

Bonding insulation materials and all types of foam

Repair of loose or torn out screws and hinges

Fixing wall panels, skirting, cladding etc

Will bond almost all types of wood

Installation of cable channels

and much more

Limitations

At least one of the surfaces to be bonded must be porous.

Not suitable for polyethylene, polypropylene, Teflon or Nylon.

Surfaces may be damp, but moisture content of wood must not exceed 30% w/w.

As product expands slightly on curing, do not use on sheet laminate; use STICK 2 CONTACT ADHESIVE.

Only apply between +5°C and + 35°C.

Ensure surfaces are always clamped during use.
