

straight spokeshave - with flat base CLIFTON 600

One only remaining at this price

Manufactured from virtually unbreakable spheridal graphite/malleable iron; the surfaces of Clifton spokeshaves are finished and polished to give maximum comfort in the hand.

The weight and balance allows the Spokeshave to sit firmly on the wood so that only a stroking action is required to make them cut. The firm seating of the blade and fine adjustment allow the woodworker to make delicate nuances in the weight of cut.

Blade made from Clifton's cryogenically treated 01 steel.
