

# SOVEREIGN system - hollowing set

This set focuses on one of Robert Sorby's most popular items – the Multi-Tip Hollowing Tool (RS200). This tool's versatility is legendary in woodturning circles. Whether you're starting out or have been turning wood for many years this tool provides a flexibility that enables the turner to make light work of more specialist projects such as hollowing, beading, coving, dovetailing and recessing thanks to the number of available cutters. An extensive range of woodturning projects can be completed with this set. See more of The Multi-Tip Hollower's features and benefits on page 24.

Set Includes:

SOV-RS200 Multi-Tip Hollowing Tool – one of the great all rounder specialist tools

200C – Multi-faceted scraper cutter

211C – For hollowing gentle curves on bowls

212C – For rapid initial hollowing and crisp angles

840 Spindle Gouge 5/8" – details spindle work

843 Spindle Roughing Gouge 3/4" – turns square to round, a real work horse

842 Bowl Gouge 5/8" – makes light work of bowl turning

830 Standard Parting Tool 1/4" – for parting off work and great for detailing
