

Alukap-XR 45mm Standard Bar Any RAL Ref=

The Alukap®-XR 45mm Glazing Bar System is world leading with its all-aluminium full cover cap system, which eliminates the need for any unsightly plastic caps or connectors. The high quality multi-fin gasket systems combined with the variable pressure fixing screws supplied with the system allows glazing from zero degrees pitch to vertical glazing designs. The robust aluminium base bar and cover cap are ideal for securing glass or Axiome® multiwall to hardwood, steel, or any other substructure.

Alukap®-XR 45mm Glazing Bar System provides excellent aesthetics and naturally aligns to structures with 45mm rafters, although it can be used for rafters of any thickness. The 45mm Alukap®-XR system also comes with Wall Bars and Gable Bars to suit any terminating rafter scenario.

The Alukap®-XR system is manufactured in White RAL 9010 and Brown RAL 8040 ready for immediate despatch. Any other RAL or BS colour can also be manufactured to order, to suit any specific chosen colour scheme.
