

Corrapol Foam Eaves Filler Low Profile =

Corrapol Foam Eaves Filler Low Profile - 900mm

Stormproof Sheets are made from a virtually unbreakable plastic resin making it the strongest and longest lasting product that Corrapol have to offer. Because of this plastic resin it offers supreme strength and excellent weather resistant characteristics offering a long life span on the product. Because of it's strong material the product will not go yellow over time or become weak with age, this also helps when installing the product as cracks will not formulate when fitting the product because of it's strong material. The UV protective layer means you will have superior light transmissions for many years.
