

Corrapol Stormproof High Profile Sheets=

CORRAPOL® Stormproof Sheets are the strongest and longest lasting sheet within the CORRAPOL® range is the CORRAPOL® Stormproof range. CORRAPOL® Stormproof clear sheets are extruded from virtually unbreakable plastic resin which offers superior strength, excellent clarity and above all unrivalled weathering characteristics resulting in a very long life span. This superior strength and longevity mean that CORRAPOL® Stormproof clear sheets will not go yellow or brittle with age, and won't crack during installation like lower cost PVC options tend to. CORRAPOL® Stormproof clear sheets are made from resin which makes them 200 times stronger than glass of the same thickness which is generally considered to be virtually unbreakable and what we call 'Stormproof'. The UV protection layer incorporated in to the manufacturing process of CORRAPOL® Stormproof sheets mean they will provide superior light transmission for many years.

Qualities

Virtually Unbreakable

Estimated 25 Year Lifespan

Doesn't Crack when Fixing like PVC

Common uses

Carports

Canopies

Cold Frames

Porches

Greenhouses

Covered Equestrian Areas
