

# Rutland Responder 24

The Rutland Responder 24, Electromagnetic Door Closer has been designed with universal handing and ease of fitting with the hygienic plug and go wiring. Having a size EN4 which can be Hold Open or Swing Free and fitting on either left or right hand doors has made them easy to specify and order. The one box and one code make the unit very manageable for the fitter, buyer, merchant stockist or specifier. Fire and endurance tested to meet and exceed the European standards that will leave your doors closed in a fire and emergency situation. The Electromagnet is activated by the Fire alarm system or over ridden on the switch if required making it very versatile and easy to use. These closers are tested to 60minutes in successful EN 1634 fire tests.

- Hold Open or Swing Free Function available. Both options are available and come in one box
- Non-Handed and Universal Installation – Can be installed on Pull or Push side , LH or RH doors – making specification, purchasing, stocking and shipping easier
- One Code, One Box – Everything in one box all you need to know is the finish, you can't select the wrong parts and eliminates costly product returns
- Designer Range of finishes to compliment existing Rutland door closer ranges
- Electro-Mechanical Hold Open Function – eliminates doors creeping, ensures closers don't creep and avoids the risk of damaged doors, costly call outs and physical repairs. Making creeping doors a thing of the past
