

Alpha Chem Professional Decorators Caulk

Cromar Alpha Chem Professional Decorators Caulk is a flexible water based filler and sealant that is easy to apply, dries quickly and can be overpainted with most emulsion and oil based paints. For interior use. Overpaintable with emulsion paints after 1-2 hours providing a skin has formed. For oil based paints allow 24 hours before painting.

Ideal for:

- * Sealing and filling of interior gaps and cracks where movement can occur, such as those between plasterwork and window and door frames, skirting boards and architraves.
- * Use prior to painting or papering to prevent unsightly cracks developing later.

Limitations:

- * Among others not recommended for continuous water immersion and not for use on PE, PP, PTFE, PC, PMMA, soft plastics, neoprene and bituminous surfaces.
- * Painting over with highly filled emulsion paints can cause cracks in the paint film. Adhesion tests prior to application are recommended.
