

# Primed White Range - Flat Plate

Designed to enable total colour co-ordination of decor schemes, the front surface of these primed plates can be coloured to meet the specific requirements of users, architects and interior designers.

The primed white ranges are supplied in Grid format so that the front plates can be painted separately and then fixed to the electrical component.

The ultra-flat profile of these primed plates is enhanced by the use of neatly recessed flat head fixing screws secured by the use of a supplied Allen Key. After painting these screws, when inserted, fit flush with the front plate, blending nicely with it. As an added advantage the Allen Key screw provides resistance to tampering for those more vulnerable installations such as public buildings and schools.

It is recommended that the primed plates are spray painted for a smoother finish, however paint can also be applied with brush or roller.

Sizes:

Single: 86 x 86 mm

Double: 86 x 147 mm
