

Firehouse XL Cargo Tote FHXL

The Firehouse CARGO TOTES™ were designed in consultation with US fire operatives for the safe transportation and organisation of the tools they require. They are very similar to the original Veto Pro Pac Cargo Totes (CT-LC and CT-XL) with the enhanced visibility from orange handles and silver-grey exterior.

The FH-XL FIREHOUSE CARGO TOTE™ features 40% greater cargo storage capacity than the FH-LC. It offers maximum bulk storage and hauling capacity in a tough, stand-up, durable tote configuration. With Veto Pro Pac's signature 3mm Polypropylene bottom, this tote excels at hauling, storing and organizing fire equipment and heavy gear on the call or off.

An optional shoulder strap is sold separately.
