

Liquid Roof system

Liquid Roof is an easy to use, all weather roofing system ideal for waterproofing any flat or pitched roofs. The Liquid Roof system creates a solid waterproof membrane covering the entire surface area without any seams. Liquid Roof is a polyurethane based, cold applied, ready to use product ideal for use on roof areas for new projects, extensions or to refurbish an existing, leaky roof with excellent adhesion to both porous and non-porous substrates.

Liquid roof:

- Provides cost-effective life-cycle extension of failing roofs
- Is fast-curing – rain resistant in 10 minutes
- Ready to use
- Can be reinforced with Sikalastix Fleece 120
- Easily recoated, no stripping required
- Retains flexibility even at low temperatures
- Compatible with most common substrates

!! Please note, we recommend that Liquid Roof is used in conjunction with the Sikalastix fleece. If you are unsure whether the fleece is required, please contact everbuild.technicalservices@uk.sika.com with details of the roof you will be using the product on for advice !!
