

Work light Inspection hand held torch

The Core Lighting CL400 is a four mode 2 in 1 multi-functional torch.

It has a top white light torch output from a single LED and a side work light output of 400 lumens.

There are four light modes: torch, work light high, work light low and red flashing.
Cycle through the modes with each press of the yellow button located on the front of the light.

The CL400 is powered by three AA alkaline batteries (not supplied) and can provide a run-time of up to 9 hours on the high setting.

The top light is perfect for use as a traditional hand held torch to see your way.

The side light is great for DIY work or illuminating a larger area.

The flashing red light is good for attracting attention, making it useful for in the car or on camping trips.

To allow hands free use, CL400 has a strong magnet on the base of the torch, perfect for work on the car or in a workshop, and the base can also stand freely on flat surfaces. A strong steel pocket clip allows for easy carrying.
