

Concave Spokeshave - CLIFTON 550

One only remaining at this price

This tool can be used instead of a drawknife to chamfer square timber but is more often used as a delicate tool by furniture makers to shaping curves or blending in curved surfaces. Ideal for work such as cabriole legs.

Clifton spokeshaves are manufactured from a virtually unbreakable spheroidal graphite / malleable iron.

The Surfaces are finished and polished to give maximum comfort in the hand and the weight and balance allow the 'shave to fit firmly on the wood so that only a light stroking action is required for the cut.
