

Standard Angle Block Plane

6-3/8" long by 2" wide ductile cast iron body

Two blade guide screws prevent shifting of blade

20° bed angle of plane and 25° bevel angle on blade result in 45° cutting angle

Low-profile lever cap allows plane to fit hand well

Blade is 1-5/8" wide, 1/8" thick, made of either A2 or O1 tool steel and lapped on non-bevel side to flatness tolerance of 0.0002" or better over working surface; average roughness surface finish of 5 microinches (0.000005") or better

Optional toothed A2 steel blade with 38° bevel

Weighs 1-3/4 lb
