

80W Soldering Iron

The Weller SP40NUK is a high performance, light-duty Soldering Iron.

3 LED's deliver light to the application for superior accuracy.

The triangular grip area provides a more stable and effective way to control the tip position.

The round, soft-grip, non-slip handle design helps relax the hand during extended use, providing a mechanism to easily roll and position the tip for application needs.

To ensure long life, the soldering iron comes with a stainless steel heater, impact resistant housing and heat resistant LED's.

Ideal for use on heat sink, ground plane, metal art and plumbing.

Wattage: 80 Watt.

Voltage: 230 Volt.

Temperature: 482°C (900°F).

Iron tip: MTG20 10mm diameter.

Other compatible tips: S38, S39.

Cord length: 1.60m.

Weight: 330g.
