

Moldex - Medical Mask *

**** Due to unprecedented levels of demand we are not currently able to guarantee lead times on dust masks. ***

If your order is urgent please contact us prior to ordering to confirm availability.

Orders placed with us will be fulfilled on a first come first served basis as stock becomes available. *

Medical Masks for bi-directional protection

A conventional Surgical Mask protects the wearer's surroundings from droplets and other particles that are expelled into the air when talking and exhaling, yet they don't protect the wearer himself.

The Moldex Air Face Masks without exhalation valves are Medical Masks and FFP Masks in one. Therefore they offer protection for both the wearer and their surroundings.

Protection for the wearer

Moldex Air Face Masks protect against
airborne contaminants [FFP2 NR and FFP3 NR according to PPE standard EN 149:2001+A1:2009]
liquid splashes [splash resistant, type IIR according to medical standard EN 14683:2005]

Protection for the surroundings

Moldex Air Face Masks have a 98% filter efficiency against bacteria [type II according to medical standard EN 14683:2005]

Due to the Moldex pleated filter technology, Air-Masks offer the filtering performance of an FFP Mask with the low breathing resistance of conventional Medical Masks, making them very comfortable to breath through.

Price

Moldex 3100 - Box of 12 (Product reference 3592-6010)	£21.96
Moldex 3100 - Case of 120 (Product reference 3592-6011)	£210.78
Moldex 3150 - Box 12 (Product reference 3592-9931)	£21.96
