

Bearing guided Aquamac 63 Cutter

Trend weather seal recessing sets Ref.330 and 331 are designed to accomodate the popular Schlegel Aquamac 63 or Exitex Aquatex P6 weather strip system and allows for a particularly small gap between the sash and frame. The slot can be positioned part way down the side of the rebate, or at the bottom of the rebate.

Ref. 331 comes complete with a guide-bearing to reduce setting-up time.

Available in 1/2" Shank only
