

14" Premium Bandsaw

An ideal workhorse for the busy workshop where power and generous capacity are required but budget and space do not allow a bigger machine.

This features an open legstand, often that provides greater stability than a closed cabinet type, and can be used with an optional pedal style wheelkit. A basic wheelkit is provided as standard.

The bandwheels are cast iron and dynamically balanced with precision ground, crowned rubber tyres usually only found on much more expensive industrial machines – the flywheel effect of the cast iron wheels improves cutting performance and speeds.

The tables on Record Power are some of the largest in their category and the one on this machine is no exception. A one piece cast double trunnion has been designed to provide even greater support and rigidity.

The rip fence is the strongest and most industrial to be found on a machine of this size with a chromed fence and the mount machined from a single piece of cast iron. The extrusion itself is a heavy section to provide rigidity and accuracy.

Maximum Depth of Cut: 230 mm

Throat Depth: 340 mm

Table Size: 548 x 500 mm

Table Height from Floor: 998 mm

Motor Power: 1 1/2 hp

Blade Length: 103 1/2"

Blade Width Capacity: 1/4 - 3/4"

Blade Speed: 820 & 380 M / minute

Extraction Port Diameter: 100 mm

Weight: 100 kg

Size: H1795 x W880 x D780 mm
