

Premium 10" Bandsaw

This machine, although compact, is a robust, well built and welcome addition to any workshop.

With a cast iron table it is designed to offer those with limited space or budget a real bandsaw, with sensible capacity and performance. This is the smallest machine in the range but should not be confused with the lightweight hobby machines that are increasingly available with many dealers.

It shares the same essential build qualities as its larger Recor Power cousins – strong steel frames, dynamically balanced bandwheels, cast iron tables and an induction motor. It has been designed to offer the user with space restrictions a serious machine in compact form. The machine can be bench mounted or fitted to the optional stand and wheel kit, providing great flexibility in the workshop.

Maximum Depth of Cut: 120 mm

Throat Depth: 240 mm

Table Size: 315 x 350 mm

Table Height from Floor: 370 mm

Motor Power: 1/2 hp
