

Multi tip hollowing tool RS200KT

The Multi Tip Hollowing Tool (RS200KT) is suitable for those who wish to take their first steps in hollowing and experienced turners that find themselves working on projects of 6" and under. It is one of the most versatile tools available.

The $\frac{3}{4}$ flat surface is in permanent contact with the tool rest and so minimises the impact of rotational forces putting the turning in control and allowing him to be as delicate or as aggressive as he wishes

It features two hollowing tips which are fitted to a swivelling clamp

Swivelling clamp allows for straight hollowing and undercutting under a rim

One tip is rounded to create a flowing shape like bowls

Second tip is pointed for squarer shapes like boxes

Second end of each HSS tip is left plain for the turner to shape to his specific requirements

Also includes a scraper blade for finishing

Scraper has three different working faces making it a round scraper, a half-round scraper and a square scraper all rolled into one

Scraper can be used on the half-round shank for shear scraping

All three tips or cutters are HSS and sharpened with a diamond hone on the top

Spare tips and cutters available

Separate beading, coving, and dovetailing cutters available separately.

*** By purchasing this product, you are confirming that you are AGED 18 or over and that the person receiving the delivery is also over 18.

Please note that we do occasionally ask for proof of age. ***
