

Ludlow Range Of Handles =

MARCUS BLACK IRON LUDLOW DOOR HANDLE FB5800

A simple black door handle on backplate, with a smooth, round lever and a traditionally designed, Tudor-style back-plate, part of the latest smooth, black iron range from M. Marcus.

To meet modern design preferences M. Marcus have removed the deep surface indentations found in traditional black ironmongery. Leaving only the natural surface grains to create a rustic yet smoother contemporary appearance. These black iron door handles will complement traditional solid wooden and hollow flush doors.

All the black door handles in this collection are made from malleable iron, treated with zinc phosphating process and then powder coated that has unique UV protection added to the coating process making these handles a great choice for external use.

The lever latch version (FB4710) has a flat plate for doors that don't require any locking, fit with a tubular latch to operate.

The standard profile (FB4700) suits a door fitted with a sashlock and allows access using a key. The euro profile (FB4748) suits a door with a euro cylinder sashlock fitted.

The bathroom version (FB4730) comes with a turn and release which when fitted with a bathroom lock will lock the door without the need for a key.
