

Escutcheon Fb159 =

MARCUS BLACK IRON SQUARE ESCUTCHEON FB158 (ALL PROFILES)

A simple black escutcheon that has a square shape, available in euro or standard profile for use with euro cylinder locks or standard UK locks. This black iron escutcheon is part of the latest smooth, black iron range from M. Marcus.

To meet modern design preferences M. Marcus have removed the deep surface indentations found in traditional black ironmongery. Leaving only the natural surface grains to create a rustic yet smoother contemporary appearance. These black iron escutcheons will complement traditional solid wooden doors or light coloured door fronts. Through use and time, the metal will not be effected by the elements due to quality and production process.

All the black escutcheons in this collection are made from malleable iron, treated with zinc phosphating process and then powder coated that has unique UV protection added to the coating process making these handles a great choice for external use.
