

Remote control kit for outdoor lights / gates etc

This Wisebox kit from Focus SB allows you to remotely control up to four circuits.

The circuits could be for lights or electric gates or shutters or to control a water feature for example.

There are four PIR timer dials for each circuit so up to 16 PIRs can be connected if desired.

The remote control fob has a range of up to 200 metres in favourable conditions, and there is a wall panel controller included as well.

For further information see

The kit includes the Wisebox itself, a wall panel control and a remote control fob.
