

Carina Lever On Rose - Polished stainless steel

FRELAN CARINA DOOR HANDLE J405

An angular return to door designed stainless steel door handle on rose. This lever curves right back in towards the door, which allows the hand to be encircled securely by the handle and avoids clothing being caught during use for added safety.

Available in satin or polished stainless steel, the Carina door handle is perfect for modern interior design in both residential and commercial settings.

Part of Frelan Hardware's stainless steel furniture range, these lever door handles have a 52mm rose, are made using grade 304 stainless steel and are tested to 200,000 cycles, ensuring great durability, suitable for high frequency of use.

This door handle on rose has matching stainless steel turn and releases or key hole escutcheons available, please see the related products below. Internal doors need the standard lever set, locking doors need the lever set with escutcheons. For bathroom doors, opt for the turn and release or the easy turn and release.

Supplied in PAIRS complete with fixings.
