

Finger plate - 300x75mm Polished stainless steel

A hard-wearing, blank and modern finger plate with an effortlessly simple rectangular shape. The quality materials provide great quality and durability. This design is great for both commercial and residential applications.

Finger plates are commonly used on the other side of the door to a pull handle, or used separately with levers or knobs to protect the door from finger marks. Matching door handles on rose or backplate available from quality manufacturer Frelan Hardware.

Supplied in SINGLES complete with fixings.
