

Rim Lock 6" x 4" Black

This model is a Rim Sash Lock that allows you to have deadlocking functions using the keys. Access can be achieved from either side using one of the two provided. This model can also have space for a follower which means it can have handles attached and fitted, which will work with the latch, pulling it back for quick entry and exits rather than only using the deadlock. This rim sash lock would be suitable for applications such as sheds, gates, storage rooms etc

The latch on this model is also reversible, giving an excellent amount of flexibility in regards to where you can install this around your home or business. This model comes with 2 keys
