

# Giselle - lever on rose - Satin nickel

This Giselle Lever on rose (JV652) comes from Frelan Hardware in their brand new Parisian range of door furniture. It is a contemporary handle, but will also complement traditional surroundings due to its distinguished European feel.

The Giselle lever grip features an organic spiraling wave design which leads to a slightly bulbous end and is topped with a decorative finial. The handle is set on a round rose, which features concentric circles. The lever is solid and manufactured in Europe from high quality genuine solid brass which is then finished in either polished nickel, polished brass, satin nickel, or antique bronze. The fixings are concealed by the high quality screw- on rose.

The Parisian range of furniture from Frelan Hardware is crafted from solid brass and offered in four beautiful finishes inspired by the designs of the Art-deco movement. This range will bring style and elegance to any home.

Matching escutcheons, thumbturns and door knobs also available, see a small selection in related products below.

Supplied in PAIRS. Complete with fixings.
