

# Jedo Parisian open escutcheon Antique bronze

The Parisian range of keyhole escutcheons boast a very traditional decorative design, and are available in the highly sought-after Antique Bronze finish, as well as the more traditional Polished Brass, Polished Nickel and Satin Nickel finishes.

This is the 'open' version, which has no keyhole cover cap.

With a diameter of 42mm and a thickness of around 6mm, these are more of a traditional size than the more contemporary 50mm escutcheons which more often project around 10mm off the door.
