

# Hole saw arbors and pilots

The AA1 (11mm shank) and AA4 (9.5mm shank) arbors will fit hole saws from 14 to 30mm the difference between the two is the size of shank that goes into the drill chuck.

The AA2 Arbor fits the rest 32 to 210mm it has two metal pegs that locate in the larger hole saws stopping them over tightening

Please note that HSE Extension rod has a 22mm shank therefore it will only work with hole saws larger than 24mm.

## Price
