Keep Projection: 25mm

Additional information

The newbury handle is part of the period range of window furniture. A simple subtle design that will suit any setting.

Our weighty newbury window handle range is forged from solid bronze which emphasises the high quality materials and manufacturing techniques used. A perfect design choice to use throughout your property with many other matching products available.

This finish is manufactured from solid unlacquered bronze containing a minimum of 85% copper. Our aged bronze finish is matt and rich due to the finishing process we use to age the metal, this process initially darkens the material, however the finish will gradually oxidize over time revealing the warmer copper undertones. This finish has been salt tested to 480 hours.

Designed to fit casement windows and match the newbury stays and door handles in the range.

The handle is night venting and can be locked in the open position as well as the closed position allowing some ventilation.

Reversible design and includes two keep plates for both left and right handed windows. The fastener also has a locking mechanism by the way of a grub screw.

Suitable for use with weather-stripped windows.

Supplied with matching wood screws.
