

Skew chisels - PREMIUM wood line plus

These specialist chisels have a 30° skew to the blade. This makes them particularly suited to cleaning out corners, dovetails and jobs in areas that cannot be reached by standard chisels where a straight blade may be restricted by aspects of the workpiece.

The forged blade is made of traditional Cr-Mn steel and heat treated to 59 HRC.

The ergonomic handle is made from hard and hefty hornbeam wood is strong enough to withstand blows from a mallet.

The combination of stained hornbeam handle, brass plated ferrule and improved grinding of the cutting edge creates a unique design of tool.

They are available in a variety of sizes with the skew to the right or the left edge of the blade.

Price

6mm (1/4") - RIGHT hand Skew Chisel - 811106 (Product reference 9230-20923)	£13.22
