

York Architectural Euro Sashlock 2 1/2" X 3"

The Heritage Brass York Architectural Euro Profile Sash Locks are designed for use on external doors which require to be latched and securely locked using a Euro Profile cylinder. They can be used with Euro Profile door handles on backplate that have 8mm spindles and 48mm centres (CTC). The 2.5" sash lock is recommended for Lever door handles on rose requiring bolt through fixing or the 3" sash lock is recommended for Mortice Knobs.

Part of the Heritage Brass York Collection of Locks and Latches, these Euro Sash Locks are created using solid brass and are available in PVD Brass, Polished Stainless Steel and Satin Stainless Steel finishes.

An Iseo Euro Profile cylinder or similar will be required to operate the bolt. The Sash Lock can be easily reversed for door handing without opening the lock by turning the latch bolt.

Rebate Kits to Suit:
