

# Woodmaster Super Cutter Screws - A4 Stainless (Pozi Drive)

For universal use when fastening to wood, chipboard, MDF, plastic, OSB and composites.

A4/316 grade Stainless Steel:

- Offers superior corrosion resistance.

Double countersunk head:

- Improves neck strength reducing head shearing in high torque applications.

Countersinking nibs:

- Enables smooth self-countersinking in both timber and sheet material applications.
- The nibs cut the wood surface, trimming from the edge of the drilled hole.
- The screw is driven home flush to the wood surface every time.

Reamer shank:

- This helically fluted milling thread clears drilling debris and reduces driving torque (from 60mm onwards).

High quality aggressive threadform:

- Improves penetration and reduces driving torque.

Deep precision formed pozi recess:

- Allows greater torque to be applied and decreases the likelihood of "camming out".

Type 17 cutting point:

- Aids penetration and eliminates the need to pre-drill in almost all timbers and composites.
- Special long sharp point fluted to capture chips.
- Eliminates splitting even when close to the edge of the timber.
- No pre-drilling required in most hardwoods (Particularly dense woods may need pilot hole).
- Screw point takes immediate hold.
